

OpenAI Dumps Musk's Cursor, a Judge Guts the Pentagon's Anthropic Ban, and Sony Sues Claude's Maker

TL;DR

- ▶ OpenAI is cutting Cursor off its models by Nov 12 after Elon Musk's SpaceX bought the coding tool — Musk says he "couldn't care less."
- ▶ A federal judge ruled the Pentagon's blacklisting of Anthropic was unconstitutional retaliation, though Claude's government wind-down still finishes Sept 30.
- ▶ Sony and Warner sued Anthropic over alleged copyright theft, naming CEO Dario Amodei personally as a defendant.

AI TIPS

use AI better — how to do it

Ship an iOS app end-to-end with Codex

1. Build a working app in Xcode, then give Codex the prompt below — it will build, archive, and distribute the app for you.
2. Have Codex open App Store Connect, sign in, and fill in your listing: description, screenshots, and the rest.
3. Complete the App Review contact, age-rating, and content-rights fields, checking each answer before continuing.
4. Set your price, click "Add for Review," fix anything flagged, then submit.

Paste-ready: Build this app and send it to App Store Connect.

Build a local file-converter with Claude before software gets retired

1. Spot files locked into software that's about to disappear, e.g. Microsoft retires Publisher on Oct 1, 2026.
2. Tell Claude what you need: scan a folder for the file type, convert each one, save the output next to its source.
3. Ask Claude to also write a batch file so a less technical colleague can run it without touching PowerShell.
4. Ask Claude to turn the exchange into a reusable prompt template for the next software sunset.

AI NEWS

the news — then what it means for you

OpenAI is cutting Cursor off its models by Nov 12, after Elon Musk's SpaceX bought the coding tool last month.

OpenAI cites Musk's history of breaking agreements as the reason; Cursor's CEO says OpenAI models are only about 5% of Cursor's usage. Musk's response: "I couldn't care less."

What it means for you: Platform access from a rival lab can vanish overnight once ownership changes hands — worth building client-facing AI tooling with a fallback model in mind, not single-vendor lock-in.

Source: The Rundown AI

A federal judge ruled the Pentagon's blacklisting of Anthropic as a "supply chain risk" was unconstitutional retaliation. Judge Rita Lin found the June designation, the first ever applied to a U.S. firm, violated the First and Fifth Amendments. The label stands pending appeal, and the Pentagon's wind-down of Claude finishes Sept 30 regardless.

What it means for you: A useful precedent if a client worries about a vendor being cut off for policy pushback — but Anthropic likely loses the government customer either way, so the legal win doesn't undo the commercial damage.

Source: The Rundown AI

Sony Music and Warner sued Anthropic over alleged copyright theft, naming CEO Dario Amodei personally as a defendant. The suit calls it "one of the largest and most blatant" cases of AI training-data infringement to date.

What it means for you: Add this to the running list of AI copyright suits (OpenAI, Suno, Udio, now Anthropic) — worth flagging to any client evaluating AI-vendor legal exposure before a procurement decision.

The U.S. secured a 100-year deal for access to more than a fifth of Venezuela's oil reserves, over 65 billion barrels across 17 fields. The private venture, led by Venezuelan businessman Alejandro Betancourt, becomes the world's second-largest corporate holder of proven oil reserves after Saudi Aramco; Venezuela's government says it brings tens of billions in investment and \$209B in tax revenue, while Sen. Tim Kaine called it "corruption at epic scale."

PM angle: A live case study in how fast energy-sector risk and opportunity can shift under a new political deal — relevant if any client touches energy, logistics, or Latin America market entry.

Conversation starter: *Did you see the U.S. just locked up a 100-year stake in Venezuelan oil? Curious how that shakes out for energy clients.*

Tim Cook's last day as Apple CEO was today; John Ternus, SVP of Hardware Engineering, takes over tomorrow. Cook stays on as executive chairman. Per Bank of America, Apple's market cap grew roughly \$32 million per hour, every hour, across his 15 years leading the company.

PM angle: A clean case study in planned succession at a company that famously avoided founder-dependency risk — a good reference point for a client's own leadership-transition planning.

Conversation starter: *Tim Cook just handed Apple to John Ternus after 15 years — what does our own succession plan look like if a key leader stepped back tomorrow?*

NASA's Nancy Grace Roman Space Telescope launched Sunday on a SpaceX rocket, carrying a mirror repurposed from a donated spy satellite. Its field of view is over 100x wider than Hubble's and it captures data roughly 1,000x faster, generating about 1.4 terabytes a day hunting dark matter, dark energy, and exoplanets; first images are expected in early 2027.

PM angle: No direct relevance to your work, general awareness only.

Conversation starter: *NASA just launched a telescope built from a recycled spy satellite mirror — wild what gets a second life in space.*

The economy unexpectedly lost 23,000 jobs in July; analysts expect a rebound of about 58,000 jobs when August's report lands Friday. Markets dipped Monday (S&P 500 -0.3%, Nasdaq -0.5%) after new Fed Chair Kevin Warsh signaled rates could rise in September to fight inflation.

PM angle: Directly relevant to budget and hiring conversations — a rate hike instead of a cut changes the calculus for any client planning fourth-quarter spend or headcount.

Conversation starter: *With the new Fed chair signaling a possible rate hike instead of a cut, are we still planning Q4 budgets around cheaper borrowing?*

Shiyazh Pete, an undrafted rookie offensive tackle, became the first member of the Navajo Nation to sign an NFL contract — even after being cut from the Dallas Cowboys' final roster. He received a standing ovation from fans during a preseason game and says he plans to keep pursuing an opportunity elsewhere.

PM angle: No direct relevance to your work, general awareness only.

Conversation starter: *Did you catch the story about the first Navajo Nation player to sign an NFL contract? Great underdog story even though he didn't make the final roster.*
