

Nvidia's Record Quarter, Claude Cowork Gets a Browser & Salesforce Debuts Claudeforce

TL;DR

- ▶ Nvidia posted \$96.2B in quarterly revenue (+106% YoY) — Jensen Huang calls it an AI industry "inflection point."
- ▶ Claude Cowork can now browse the web itself in a side panel, and Salesforce's earnings-fueled "Claudeforce" brings 37 Claude skills into its platform.
- ▶ Try the Grok Bot playbook below to delegate meeting prep, prospecting, and follow-ups to a team of purpose-built AI "Bots."

AI TIPS

use AI better — how to do it

Build an AI "GTM Team" with Grok Bot

1. Download the Grok Bot desktop app and sign in.
2. Go to Plugins and connect tools like Gmail, Drive, Slack, Salesforce, and Granola.
3. Click "+" → Create new Bot, describing its role and workflow in plain language — start with a Chief of Staff Bot for meetings, emails, and follow-ups.
4. Spin up more Bots for prospecting, forecasting, or sales coaching, and give each a clear name so they're easy to find in the sidebar.

Paste-ready: Manage my meeting prep, inbox, and follow-ups. Keep updates concise and draft responses in my writing style without sending them.

AI NEWS

the news — then what it means for you

Nvidia posted \$96.2B in quarterly revenue, up 106% YoY — roughly \$1B a day — with CEO Jensen Huang calling it an AI industry "inflection point."

What it means for you: Enterprise AI infrastructure spend shows no sign of slowing — a useful data point for budget conversations with clients weighing their own AI infra investment.

Source: Superhuman AI

Anthropic's Claude Cowork can now open its own web browser as a side panel inside chats to search and gather information, rolling out to paid desktop plans over the next week.

What it means for you: Worth piloting for research-heavy workstreams — an agent that browses live while you supervise closes a real gap versus static chat answers.

Salesforce reported \$11.3B in quarterly revenue (+11% YoY), sending its stock up 20%, and debuted "Claudeforce" — a Salesforce/Anthropic integration bringing 37 pre-built skills into Claude chats.

What it means for you: If clients run Salesforce, this is a concrete new AI entry point to raise in scoping conversations — model providers are now integrating directly into major SaaS platforms.

AI demand is pushing device prices up — Nvidia plans to raise prices starting in 2027, and Apple's refreshed Mac mini (built for on-device AI workflows) costs more than its predecessor.

What it means for you: A minor budgeting flag for teams planning hardware refreshes around on-device AI capability.
